

AIR SPEED DRIVE DOPPIO RAFFREDDAMENTO

Doppio raffreddamento del gruppo trasmissione con la ventola "AIR SPEED DRIVE" sviluppata dalla Polini Motori.

Utilizzando AIR SPEED DRIVE si migliora notevolmente l'aerazione all'interno del carter trasmissione pertanto perfeziona sensibilmente sia le performance del motore nelle lunghe percorrenze sia la durata della cinghia.

Le pulegge Polini SPEED DRIVE e CERAMIC SPEED DRIVE per Piaggio e Yamaha sono vendute complete di ventole AIR SPEED DRIVE.
E' anche possibile comprarla singolarmente.

Codice 246.032

100% Made in Italy

AIR SPEED DRIVE TWIN COOLING

Twin cooling of the transmission group with the "Air Speed Drive" developed by Polini. By using the AIR SPEED DRIVE you improve decisively the aeration inside the crankcase and consequently it increases both the engine performance for long distances covered and the belt life. The Polini SPEED DRIVE and CERAMIC SPEED DRIVE for Piaggio and Yamaha include the AIR SPEED DRIVE fan too.

It is also sold individually.
