ORIGINAL FILTERS | FILTRI ORIGINALI

Improve air flows during the intake phase. Thanks to their characteristic of filtering and purifying the air perfectly, they optimize the fuel-air mixture increasing the value so that the engine is more performing. They are made up of two sponge layers; a finer one of light blue color with 60 PPI porosity and one opener of black color with 30 pp porosity. The external surface is waved. It offers a greater entrance of the air flow, retaining a 50% more of dust particles.

Migliorano i flussi d'aria in fase d'aspirazione. Grazie alla loro caratteristica di filtrare e depurare perfettamente l'aria ottimizzano la miscela aria-benzina aumentando i valori così da rendere il motore decisamente performante. Sono composti da due strati di spugna; uno più fine di colore azzurro con porosità di 60 PPI ed uno più aperto di colore nero con porosità di 30 PPI. La superficie esterna si distingue per essere ondulata, offrendo una maggiore entrata dei flussi d'aria ma trattenendo nel tempo stesso il 50% in più della polvere grossolana.
